Summary

Software Engineer with 4 years of experience building scalable, high-performance web applications using React.js, Next.js, TypeScript, and modern UI frameworks. Skilled in real-time data solutions, secure authentication (Keylock), RBAC, REST API integration, and performance optimization. Strong in database schema design, clean architecture, UI/UX issue resolution, and Agile development.

Skills

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, SCSS.
- **Frontend:** React.js, Next.js, Material UI, Bootstrap.
- **State Management:** Redux, Redux Saga, Zustand, React Query.
- **Backend & APIs:** REST APIs, WebSockets, Authentication (Keycloak), RBAC.
- **Database:** MySQL, SQL, Database Design.
- **Tools:** Git, Jira, Postman, SVN.
- **Concepts:** Agile, Performance Optimization, Responsive Design.

Professional Experience

Software Developer

Bigul (Bonanza Portfolio Ltd.),

Indore, India Mar2026 – Present

- Developed a scalable frontend web application from scratch using React.js, ensuring clean architecture and maintainability
- Built and enhanced a web trading platform handling real-time market data and trading workflows
- Contributed to Support Ticket Portal, resolving client-raised issues and improving ticket handling workflows
- Implemented state management using Zustand, Redux, and Redux Saga for efficient data flow
- Designed reusable logic using custom React hooks to improve code efficiency
- Integrated REST APIs with proper error handling and optimized data fetching
- Debugged and resolved production issues, improving application stability
- Collaborated with backend and product teams to deliver fintech features

Software Developer, (Sthapatya Consultant Pvt. Ltd.)

Amravati, India 11/2025 – 02/2026

Projects :- WTS (water Tax System), Assets Management System

- Performed **code reviews**, evaluated **folder structure**, and enforced best practices to maintain clean, scalable, and maintainable code.
- Led the frontend development team using Next.js and React.js, ensuring high-quality UI implementation and smooth user experience.
- Identified, debugged, and resolved **UI/UX issues**, improving interface consistency and performance across modules.
- Collaborated with cross-functional teams working on **municipality taxation systems** and **water management modules**, contributing to feature enhancements and UI flows.
- Supported backend and data teams by designing **database schema**, creating **SQL tables**, and participating in overall data structure planning.
- Coordinated with stakeholders to translate functional requirements into intuitive and responsive frontend components.
- Optimized component performance and implemented reusable frontend layouts to reduce development time.
- Integrated **REST APIs** with frontend components, ensuring efficient data flow, error handling, and seamless communication between the UI and backend services.

Software Engineer, (Welldoc Software)

Bangalore, India 04/2021 – 09/2024

Project Contributions: Worked on key projects including Astellas, Health Optimizer, Conifer Connect, and MDLive, enhancing user experience and functionality.

- Developed responsive and user-friendly interfaces using React.js, TypeScript, and Material-UI, ensuring high performance and accessibility. Developed fully responsive web pages, optimizing performance and user experience on both desktop and mobile devices.
- Led the implementation of a comprehensive real-time data infrastructure, integrating web sockets for instant communication, authentication mechanisms including Keylock, and Role-Based Access Control (RBAC) protocols, ensuring secure and efficient data management across the platform.
- Enhanced web application performance metrics to achieve a 90% improvement by leveraging Google Lighthouse for assessing performance, accessibility, best practices, and SEO aspects of web pages.
- Implemented Redux for state management, optimizing data flow and application performance across various components.
- Integrated React Query for data fetching and synchronization, enhancing the application's responsiveness and user experience.
- Followed Agile methodology to resolve JIRA issues effectively, participating in sprint planning and retrospectives to improve team performance.

Projects

Web Trading Platform (Bigul)

- Developed frontend modules for real-time trading system
- Integrated APIs for market data and order execution
- Improved UI responsiveness and performance

Support Ticket Portal (Bigul)

- Built ticket management system for handling client issues
- Improved resolution workflows and UI usability

Education

Bachelor of Science (Computer Science) *University of Amravati*
MCA (Computer Application) *PRMITR*

Amravati, India 2015-2018
PRMITR, Amravati 2018-2020
