

Dhawal Deolasi

Software Developer (Frontend) / Full stack Developer

 Amravati, India |  +91-8421158336 | dhawaldeolasi04@gmail.com | [Linked In](#) | [Portfolio](#) |

Summary

Software Engineer with **4 years of experience** developing scalable, high-performance web applications using **React.js, AngularJS, Next.js, TypeScript, Node.js, and modern frontend architectures**. Experienced in building fintech and healthcare platforms with **real-time data handling, REST API integrations, WebSockets, authentication (Keycloak), RBAC, and performance optimization**.

Strong expertise in **component-driven development, reusable UI architecture, state management**.

Skills

- **Frontend:** AngularJs, React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, SCSS
- **Databases:** SQL.
- **UI Libraries:** Material UI, Bootstrap, Responsive Design
- **State Management:** Redux, Redux Toolkit, Redux Saga, Zustand, React Query
- **Authentication:** JWT Authentication
- **Deployment & Tools:** Git, GitHub, Jira, Postman, SVN, CI/CD
- **Testing:** Jest, React Testing Library, Jasmine and Karma

Professional Experience

Software Developer

Bigul (Bonanza Portfolio Ltd.

Indore, India | March-2026 – Present

Projects :- Client Dashboard, One Support Portal, IPO-Online

- Developed a scalable **React.js fintech trading platform** from scratch using modern frontend architecture.
- Built reusable components and custom React hooks, reducing duplicate code by **40%**.
- Integrated real-time market data workflows using REST APIs and optimized frontend performance.
- Implemented complex state management using **Redux Saga, Zustand, and React Query**.
- Improved application stability by debugging and resolving production-level issues.
- Developed Support Ticket Portal improving client issue management workflow.
- Collaborated with backend teams for **API design, integration**, and performance improvements.
- Developed Angular-based frontend modules using TypeScript, Angular Material, and component-driven architecture.
- Implemented Angular features including Reactive **Forms, Services, Routing, Guards, and RxJS** Observables for efficient application workflows.
- Integrated REST APIs using Angular **HTTP Client** and optimized data handling, performance, and user experience.

Software Developer

Sthapatya Consultant Pvt. Ltd.

Amravati, India | November-2025 – February-2026

Projects :- Water Tax System

- Performed **code reviews**, evaluated **folder structure**, and enforced best practices to maintain clean, scalable, and maintainable code.
 - Led the frontend development team using Next.js and React.js, ensuring high-quality UI implementation and smooth user experience.
 - Identified, debugged, and resolved **UI/UX issues**, improving interface consistency and performance across modules.
 - Collaborated with cross-functional teams working on **municipality taxation systems** and **water management modules**, contributing to feature enhancements and UI flows.
 - Supported backend and data teams by designing **database schema**, creating **SQL tables**, and participating in overall data structure planning.
 - Coordinated with stakeholders to translate functional requirements into intuitive and responsive frontend components.
 - Optimized component performance and implemented reusable frontend layouts to reduce development time.
 - Integrated **REST APIs** with frontend components, ensuring efficient data flow, error handling, and seamless communication between the UI and backend services.
-

Software Engineer

Welldoc Software

Bangalore, India April-2021 – September-2024

Projects :- Astellas, Health Optimizer, Conifer Connect, MDLive

- Developed enterprise healthcare web applications using Angular, React.js, TypeScript, HTML5, SCSS, Angular Material, and Material UI.
- Built responsive and reusable UI components following component-based architecture and clean coding standards.
- Implemented Angular features including Reactive Forms, Routing, Lazy Loading, Services, Guards, and RxJS Observables.
- Integrated REST APIs using Angular **HttpClient**, Axios, and React Query with optimized data handling.
- Managed application state using Redux and React Query to improve performance and user experience.
- Implemented secure authentication and authorization workflows using Keycloak and RBAC.
- Optimized frontend performance by improving rendering, API calls, and application responsiveness.
- Created unit test cases using Jasmine/Karma and participated in technical QA activities.
- Resolved UI/UX issues, production defects, and cross-browser compatibility problems.
- Collaborated with product, backend, and QA teams in Agile/Scrum development cycles.

Education

MCA (Computer Application)
Bachelor of Science (Computer Science)

PRMITR PRMITR, Amravati 2018-2020
University of Amravati Amravati, India 2015-2018
